Deutsche Bank IBOR Transition Update

On November 14, 2022, ICE Benchmark Administration (“IBA”), the publisher of the USD LIBOR ICE Swap Rate, announced that it intends to cease publication of all ICE Swap Rate settings based on USD LIBOR after June 30, 2023 (the “Cessation Date”). This announcement follows the announcement by the UK Financial Conduct Authority on March 5, 2021, that all USD LIBOR settings remaining after 2021 will either cease to be published or no longer be representative after the Cessation Date. The USD LIBOR ICE Swap Rate is also referred to as a constant maturity swap (or “CMS”) rate, and in this notice is referred to as the “USD LIBOR CMS Rate.”

Deutsche Bank is sending this update to announce the expected treatment after the Cessation Date of outstanding Additional Tier 1 & Subordinated Tier 2 notes listed in Table 1 below (collectively, the “Notes”) that have interest payments based on a USD LIBOR CMS Rate. The terms of these Notes provide for the Calculation Agent to conduct a dealer poll in the event that a relevant USD LIBOR CMS Rate is unavailable. In the event that no quotations are provided from the dealer poll, the terms of the Notes provide that the relevant USD LIBOR CMS Rate will be equal to the last available rate on the relevant screen page. Deutsche Bank will communicate to the holders such last available rate to be used to determine the interest payments on the Notes.
