

Deutsche Bank AG

Update

Key Rating Drivers

Deutsche Bank AG's ratings reflect the bank's good restructuring progress and the stabilisation of its business model, with most significant revenue improvement and franchise stabilisation at its Investment Bank (IB). They also reflect the bank's sound asset quality, funding and liquidity and adequate capitalisation. The ratings remain constrained by weak historical earnings, which Fitch Ratings expects to further improve as the restructuring nears completion.

German Recession Likely in 2023: Surging energy prices and supply-chain disruptions drove inflation in the eurozone to a multi-decade high in 2022, with an expected dampening effect on eurozone economic growth in the next quarters. Fitch expects a recession combined with high inflation in Germany in 2023 due to the halt in Russian gas exports.

Restructuring Nears Completion: The positive outlook on the bank's business profile score signals our expectation that the revenue contribution and cost-to-income ratio of its Corporate Bank (CB) and Private Bank (PB) will improve. Successful execution of the cost-reduction plans in combination with stable revenue is key to mitigating the earnings volatility inherent in the IB and should result in a business profile score that is commensurate with the 'a' category.

Improving Risk Controls: Large investments and improved anti-financial crime controls since 2019 have reduced litigation costs and regulatory fines, even though the bank's business model will remain exposed to these risks. Appetite for market risk is fairly limited despite sizeable trading operations, but the leveraged lending business remains exposed to valuation losses.

Asset Quality Rating Strength: Deutsche Bank's impaired loans ratio has so far been resilient due to the bank's large exposure to Germany and its good record of managing credit risk globally. We expect defaults to rise as the economic environment deteriorates, but the bank's exposure to borrowers that are more vulnerable to a halt in Russian gas supply is manageable. Our expectation that the impaired loans ratio will exceed 3% in the next two years drives the negative outlook on the asset quality score. Non-loan assets generally carry low credit risk.

Improving Earnings: The bank's operating profit/risk-weighted assets (RWAs) weighs on the ratings and is still weaker than most global peers', which tend to benefit from better pricing power in their home markets. The positive outlook on the profitability score signals our expectation that rising net interest income (NII) and lower operating costs will offset higher loan-impairment charges (LICs) in 2H22 and 2023 and maintain operating profits/RWAs above 1%.

Adequate Capitalisation: Capitalisation metrics are adequate in light of declining restructuring risk, and reflect the bank's improving, but still modest, capital generation relative to peers. We expect the common equity Tier 1 (CET1) capital ratio to remain above the management's 12.5% floor in the next two years. The fully-loaded leverage ratio is on track to meet the bank management's target of around 4.5% from 2022, as improved capital generation and additional Tier 1 capital issuance should offset exposure growth.

Diversified Funding; Comfortable Liquidity: The bank's solid domestic deposit franchise limits its reliance on wholesale funding. The latter is well-diversified but remains more confidence-sensitive than most peers'. Excess liquidity from deposit inflows and central bank tenders (TLTRO) has been deployed in lending. We expect liquidity to remain close to the management's target as weaker loan growth should offset declining deposit inflows and maturing TLTRO.

Rating Sensitivities

Factors that Could, Individually or Collectively, Lead to Negative Rating Action/Downgrade

The Positive Outlook and the ratings could come under pressure if the bank fails to execute its cost-reduction plan or if revenue significantly declines due to market-wide disruptions or franchise erosion in core businesses relative to its peers'. Rating pressure would also arise if the global economic downturn hinders adequate profits, for example by triggering persistently high LICs and eroding the CET1 ratio materially below 12.5% without swift recovery prospects.

Factors that Could, Individually or Collectively, Lead to Positive Rating Action/Upgrade

An upgrade of the Viability Rating (VR) and Long-Term Issuer Default Rating (IDR) would require a moderate impact of the economic downturn on the bank's capitalisation, with CET1 and leverage ratios sustainably above 12.5% and 4.5%, respectively. An upgrade would also require better efficiency and sustainable, balanced revenue resulting in an operating profit/RWAs of at least 1.5% on average, with good prospects of maintaining sound profits in the long term.

An upgrade of the Long-Term IDR would lead to an upgrade of the Short-Term IDR only if we upgrade the funding & liquidity score to 'a' from 'a-'. This would require maintaining a liquidity buffer in line with management's targets and clear evidence (such as tighter funding spreads, driven by more certainty that the bank's business model and capital generation are firmly strengthening) that the bank's funding has become durably less sensitive to market confidence levels.

Subordinated Tier 2 Notes	BBB-			BBB-		
Hybrid Tier 1 Notes ^a	BB					
State-Guaranteed Notes	A+					

^a Includes notes issued by Deutsche Postbank Funding Trust I and III
 Source: Fitch Ratings

The bank's Derivative Counterparty Rating (DCR), long-term deposit and senior preferred (SP) debt ratings are one notch above its Long-Term IDR, and the senior non-preferred (SNP) debt rating is aligned with the Long-Term IDR. This reflects the protection of preferred creditors by large SNP and junior debt buffers (18.1% of RWAs at end-1H22). The buffers are underpinned by the bank's subordinated minimum requirement for own funds and eligible liabilities (MREL) of 24.8% of RWAs, which is higher than its total loss-absorbing capacity (TLAC) requirement of 22.5%.

We rate the Tier 2 notes two notches below the VR to reflect the above-average loss severity arising from their subordination. We rate Deutsche Bank's CRR-compliant additional Tier 1 (AT1) notes and legacy Tier 1 notes issued by Deutsche Postbank Funding Trust I and III four notches below the VR (two notches for deep subordination and two notches for non-performance risk given their non-easily activated coupon omission). At end-1H22, the bank had a broadly stable and sufficient buffer of 253bp over the minimum required to pay coupons on its CRR-compliant AT1s.

Senior and Tier 2 bonds issued by DSL Bank are notched up three times from Deutsche Bank's Long-Term IDR, reflecting their outstanding recovery prospects. The German government (AAA/Stable), which guarantees these bonds until maturity, is extremely likely to fully reimburse the grandfathered creditors if Deutsche Bank defaults. However, we see no certainty that a reimbursement would be on a timely basis as the DSL Transformation Act from 1999, on which the state guarantee is based, does not oblige the government to honour the guarantee on first demand.

Significant Changes from Last Review

Deutsche Bank's performance in 3Q22 was a continuation of the positive momentum built in 1H22. Operating profits remained resilient through the quarter, driven by persistently high fixed-income and currency trading volumes, as well as higher interest rates on the liquidity portfolio and the corporate and private bank loan books.

Deutsche Bank reported a return on tangible common equity of 8% in 9M22, in line with its target for the full year. We expect revenue to increase to above EUR27 billion in 2022 (2021: EUR25 billion). Seasonally lower new business in 4Q22 should be more than offset by persistent high volatility in the fixed-income and currency markets so far this year, a gain of about EUR0.3 billion from the sale of Deutsche Bank Financial Advisors in Italy and the realisation of deferred tax assets.

Higher interest rates will continue to support revenue growth in 2023, in excess of the management's initial expectations. Based on end-3Q22 forward rates and a static end-2021 balance sheet, the bank now expects its NII to rise by more than EUR1 billion (+9%) in 2023 and by over EUR3 billion (+27%) in 2025 from 2021 levels. However, this growth will be partially offset by the revision in TLTRO conditions, higher funding spreads and the shift from sight to more expensive term deposits.

Operating expenses, excluding restructuring and transformation charges, were higher yoy in 3Q22 due to wage inflation, investments in risk controls and the US Dollar appreciation. The bank also postponed the finalisation of the integration of its two IT platforms in German private banking to 2H23 instead of end-2022 and earmarked EUR200 million of expenses above plan.

LICs increased to 24bp of gross loans in 9M22 (9M21: 8bp), mainly driven by precautionary provisions in 1H22 and a few larger Stage 3 events in 3Q22. We understand that the latter are episodic and not indicative of an emerging trend. The bank's management reiterated its LICs guidance of 25bp for 2022, which remains slightly lower than the average for large European banks. The impaired loans ratio was unchanged qoq as loan growth compensated for Stage 3 inflows.

The bank's CET1 ratio improved to 13.3% at end-3Q22 (end-1H22: 13.0%) due to earnings retention and flat RWAs. We expect the CET1 ratio to remain around 13% also at end-2022. Deutsche Bank's EUR1.25 billion AT1 issue in November 2022 also puts it on track to meet the management's leverage ratio target of about 4.5% at end-2022 (end-3Q22: 4.3%).

The Key Rating Driver (KRD) weightings used to determine the implied VR are shown as percentages at the top. In cases where the implied VR is adjusted upwards or downwards to arrive at the VR, the KRD associated with the adjustment reason is highlighted in red. The shaded areas indicate the benchmark-implied scores for each KRD.

VR - Adjustments to Key Rating Drivers

The business profile score of 'bbb+' is below the 'a' category implied score, due to the following adjustment reason: strategy and execution (negative).

The earnings and profitability score of 'bbb' is above the 'bb' category implied score, due to the following adjustment reason: historical and future metrics (positive).

The capitalisation and leverage score of 'bbb+' is below the 'a' category implied score, due to the following adjustment reason: internal capital generation and growth (negative).

Actual jurisdiction D-SIB GSR	ns
Government Support Rating	ns

Government ability to support D-SIBs

Sovereign Rating	AAA/ Stable
Size of banking system	Negative
Structure of banking system	Neutral
Sovereign financial flexibility (for rating level)	Positive

Government propensity to support D-SIBs

Resolution legislation	Negative
Support stance	Negative

Government propensity to support bank

Systemic importance	Neutral
Liability structure	Neutral
Ownership	Neutral

The colours indicate the weighting of each KRD in the assessment.

■ Higher influence ■ Moderate influence ■ Lower influence

Deutsche Bank's Government Support Rating (GSR) of 'no support' reflects our view that, due to German resolution legislation, senior creditors cannot rely on receiving full extraordinary state support if the bank becomes non-viable.

Subsidiaries and Affiliates

Deutsche Bank AG, London Branch's ratings are equalised with Deutsche Bank's as they refer to the same legal entity. The IDRs of Deutsche Bank's US subsidiaries Deutsche Bank Securities, Inc., Deutsche Bank Trust Corporation and Deutsche Bank Trust Company Americas are based on their SSRs, which are aligned with Deutsche Bank's Long-Term IDR. This reflects the subsidiaries' high integration and core roles in supporting the group's capital-market activities.

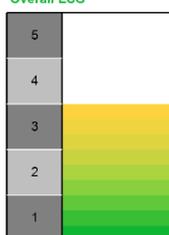

Deutsche Bank Australia Ltd.'s commercial paper programme rating is aligned with Deutsche Bank's short-term preferred debt ratings based on the strong support available from the parent.

The DCR of Deutsche Bank Securities Inc. also reflects the protection that could accrue to derivative counterparties from the bail-in debt and equity buffers at the level of the intermediate holding company DB USA Corporation.

The ratings of the above-mentioned entities are primarily sensitive to Deutsche Bank's IDRs, from which they are derived. The subsidiaries' ratings are also sensitive to a perceived decline in their strategic importance to the group.

Environmental, Social and Governance Considerations

Overall ESG

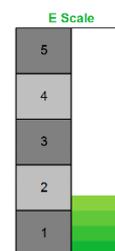

How relevant are E, S and G issues to the overall credit rating?

5	Highly relevant, a key rating driver that has a significant impact on the rating on an individual basis. Equivalent to "higher" relative importance within Navigator.
4	Relevant to rating, not a key rating driver but has an impact on the rating in combination with other factors. Equivalent to "moderate" relative importance within Navigator.
3	Minimally relevant to rating, either very low impact or actively managed in a way that results in no impact on the entity rating. Equivalent to "lower" relative importance within Navigator.
2	Irrelevant to the entity rating but relevant to the sector.
1	Irrelevant to the entity rating and irrelevant to the sector.

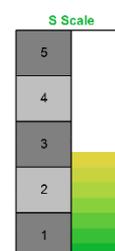

Environmental (E)

The highest level of ESG credit relevance is a score of '3'. This means ESG issues are credit-neutral or have only a minimal credit impact on the entity, either due to their nature or the way in which they are being managed by the entity. For more information on Fitch's ESG Relevance Scores, visit www.fitchratings.com/esg.

The ratings above were solicited and assigned or maintained at the request of the rated entity/issuer or a related third party. Any exceptions follow below.

DISCLAIMER & DISCLOSURES

All Fitch Ratings (Fitch) credit ratings are subject to certain limitations and disclaimers. Please read these limitations and disclaimers by following this link: <https://www.fitchratings.com/understandingcreditratings>. In addition, the following <https://www.fitchratings.com/rating-definitions-document> details Fitch's rating definitions for each rating scale and rating categories, including definitions relating to default. Published ratings, criteria, and methodologies are available from this site at all times. Fitch's code of conduct, confidentiality, conflicts of interest, affiliate firewall, compliance, and other relevant policies and procedures are also available from the Code of Conduct section of this site. Directors and shareholders' relevant interests are available at <https://www.fitchratings.com/site/regulatory>. Fitch may have provided another permissible or ancillary service to the rated entity or its related third parties. Details of permissible or ancillary service(s) for which the lead analyst is based in an ESMA- or FCA-registered Fitch Ratings company (or branch of such a company) can be found on the entity summary page for this issuer on the Fitch Ratings website.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.

Fitch Ratings, Inc. is registered with the U.S. Securities and Exchange Commission as a Nationally Recognized Statistical Rating Organization (the "NRSRO"). While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see <https://www.fitchratings.com/site/regulatory>), other credit rating subsidiaries are not listed on Form NRSRO (the "non-NRSROs") and therefore credit ratings issued by those subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.
